

CHUCK STOPS

- The Royal Chuck Stop provides a simple, consistent method for **locating short parts** in a 3-jaw lathe chuck.
- Captive, web-shaped design eliminates the danger of using spacers or parallels that could come loose and be thrown from a spinning chuck. Three strong magnets further secure the stop to the chuck face.
- Stop allows short parts to project past the chuck jaws, providing **clearance for facing operations**.
- Setup time is greatly reduced — no need to bore soft jaws.
- The Royal Chuck Stop is very accurate — front and back locating surfaces are parallel within $\pm 0.0004"$.
- Accommodates chuck jaws up to 55mm ($2\frac{1}{8}"$) wide.
- Anodized finish provides good wear-resistance.

Royal Chuck Stop Sets

DESCRIPTION	CAT. NO.	PRICE
Standard Set — includes 15, 20, & 25mm stops	25200	\$204
Deluxe Set — includes 15, 20, 25, 30, & 35mm stops	25210	355

INDUSTRIAL WORK LIGHTS

- Heavy-duty construction for tough industrial environments.
- Excellent **near-daylight illumination**.
- Flexible gooseneck for precise positioning.
- Multiple mounting options available.

Better than Halogen:

- Cooler Temperatures
- Less Power Consumption
- Longer Bulb Life
- No Dead Spot
